SUMMARY

Frontend Engineer with 5+ years of experience building enterprise web and cross-platform mobile applications using React.js, Next.js, TypeScript, React Native and Flutter. Experienced in scalable UI architecture, reusable component libraries, performance optimization, authentication, RBAC and REST API integration. Passionate about delivering high-quality user experiences through clean, maintainable code. Experienced in AI-assisted software development using Claude Code and ChatGPT to accelerate development, improve code quality, automate repetitive tasks, and enhance debugging and documentation workflows.

TECHNICAL SKILLS

Frontend	React.js, Next.js, React Native, Flutter, HTML5, CSS3
Languages	TypeScript, JavaScript (ES6+), Dart
State Management	Redux Toolkit, React Context API, React Hook Form, GetX
Styling	Tailwind CSS, Shadcn UI, Ant Design, Styled Components
Libraries	React Query (TanStack Query), Axios, React Router
Backend	REST APIs, Firebase, JWT, RBAC
Tools	Git, GitHub, NX Monorepo, ESLint, Prettier, Postman, VS Code, Android Studio, Xcode
AI-Assisted Dev	Claude Code, ChatGPT, Prompt Engineering, AI-assisted debugging & code review
Methodologies	Responsive Web Design, Cross-Platform Development, Agile / Scrum

PROFESSIONAL EXPERIENCE

Frontend Developer — Ayphen Technologies

Nov 2023 – Present

Enterprise Accounting & ERP Platform

React JS · Next.js · TypeScript · Ant Design · Tailwind CSS · Shadcn UI · Redux · Styled-Components · NX

- Developed dynamic, scalable web applications with **React JS** and **Next.js**, focusing on performance, accessibility, and responsive design.
- Built modern, consistent UIs with **Tailwind CSS** and **Shadcn UI**, delivering reusable, accessible component libraries.
- Implemented state management with **Redux Toolkit** and React Hook Form, handling complex, nested form structures with validation.
- Worked closely with designers to deliver **pixel-perfect UI**, ensuring brand consistency across platforms.
- Integrated REST APIs and optimized client-side rendering, **reducing load times by 20%** and improving user experience.
- Contributed to **monorepo architecture (NX)**, building modular and reusable components for scalability.
- Implemented **role-based access control (RBAC)** and secured routes, improving overall application security.
- Leveraged **Claude Code** and **ChatGPT** to accelerate feature development, refactoring, debugging, documentation, and test-case generation while maintaining code quality through manual review and best engineering practices.

Mobile Application Developer — Pirai Infotech Private Limited

Feb 2021 – Oct 2023

Flutter · Dart · Firebase · REST APIs

- Designed and developed cross-platform mobile applications (**iOS & Android**) using Flutter with responsive, user-friendly UI.
- Implemented **real-time data synchronization** with Firebase, improving data-handling efficiency and ensuring seamless access.
- Integrated push notifications, secure authentication (**Firebase Auth, OAuth**), and multiple third-party APIs.
- Improved app performance through **GetX** state management, lazy loading, and code optimization, reducing crashes and memory usage.
- Published and maintained multiple apps on the **Google Play Store and Apple App Store** with positive reviews and high ratings.
- Collaborated in **Agile** cycles: sprint planning, code reviews, and delivering features on schedule.

PROJECTS

Ayphen — Accounting Platform (React JS)

Responsive web-based accounting solution with dashboards, RBAC, and secure **JWT authentication**. Built real-time financial analytics with interactive charts and improved load times by **30%** via code splitting, caching, and optimized API calls.

GoWalkies — Dog-Walking & Pet-Services Marketplace (React Native)

Dual-sided marketplace connecting pet owners with walkers/service providers, built as twin **React Native** apps (Owner & Provider) sharing a common architecture. Implemented **Firebase Auth** with Google/Apple social sign-in, the full booking lifecycle with **Stripe** payments, **real-time geolocation tracking** during walks, FCM push notifications, and Branch.io deep-linked campaigns.

Docket — Document Capturing & Accounting App (Flutter)

Secure document-management and accounting app to scan, upload, and store financial documents. Integrated **RBAC** for organizational security compliance and reduced manual document-entry time by **~40%** through structured data capture.

sMenu — Food Ordering Application (Flutter)

Cross-platform food-ordering app with restaurant & menu listings, cart, and payment-gateway integration. Added real-time order tracking, a discount-coupon system, and multi-language support; optimized API and UI rendering to support **5k+ concurrent users** with minimal latency.

EDUCATION

B.E., Material Science Engineering — 2014 – 2018 · CGPA 7.59 / First Class

CARE Group of Institutions, Tiruchirappalli (Affiliated to Anna University, Chennai)

STRENGTHS

Strong problem-solving & analytical skills · Adaptable to new technologies & frameworks · Collaborative team player with effective communication · Passion for clean code & performance optimization
